- **Web Development:** ReactJs, Node.js, Html, CSS, JS, PHP.
- **Programming Language**: JAVA, PHP, C++, JS, Dart.
- **Databases :** PostgreSQL, MySQL, Firebase.
- **Design:** Figma, Adobe illistratur , Adobe inDesign.
- **Project Management:** Trello, Jira
- **Other Tools:** Git/GitHub, Virtualization, Bash.

Experience

June 2023 - September 2023
OFPPT
Web Developer | Freelancer

As a lead developer, I designed and developed an intuitive web platform to efficiently manage trainees' absences. This project involved creating a user-friendly interface, implementing absence tracking features, and securely managing user data.

April 2023 - June 2023
Medical Clinic
Web Developer | Internship

As a web developer intern at a medical clinic, I had the opportunity to design an online platform for managing medical appointments along with an integrated chat system. My role involved developing features that allowed patients to schedule appointments online efficiently and intuitively, while ensuring the confidentiality of medical information exchanged.

July 2022 - August 2022
Devosoft
Web Developer | Internship

As a member of a development team, I contributed to the creation of a business management platform. My role involved proposing technical and functional solutions to meet the specific needs of managing employee and trainee absences within the company.

Projects

- Development of a mobile emergency management application using **Flutter** and **Node.js**.
- Creation of a responsive clinical website with online appointment scheduling and chat features, using **Node.js**, **MySQL**, and **Socket.io**.
- Development of a web application for managing interns' absences, using **Node.js** and **MySQL**.
- Development of a stock management web application using **PHP** and **MySQL**.
- Development of a mobile e-commerce application using **Flutter** and **Firebase**.
